Where to go for care.

Primary Care

Includes prevention and checkups, disease prevention, health maintenance, counseling, patient education, diagnosis, management and treatment of acute and chronic illnesses.

- Wellness exams
- Disease prevention
- Health maintenance
- Diagnostic services, including x-rays and laboratory tests
- Management or treatment of acute and chronic conditions

Walk-In Care

Urgent medical conditions are ones that are not considered emergencies, require care within 24 hours and when you aren't able to see your Primary Care Provider.

- Accidents and falls
- Cuts that don't involve much blood but might need stitches
- Breathing difficulties, such as mild to moderate asthma
- Eye irritation and redness
- Diagnostic services, including X-rays and laboratory tests
- Fever or flu
- Minor broken bones and fractures in fingers or toes
- Moderate back problems
- Severe sore throat or cough
- Skin rashes and infections
- Sprains and strains
- Urinary tract infections
- Vomiting or diarrhea

Emergency Department

In general, an emergency condition is one that can permanently impair or endanger your life. Some examples of conditions that need emergency medical care include:

- Compound fracture, which involves a bone protruding through the skin
- Convulsions, seizures, or loss of consciousness
- Deep knife wounds or gunshot wounds
- Heart attack symptoms, such as chest pain that lasts longer than two minutes
- Moderate to severe burns
- Poisoning
- Serious head, neck, or back injury
- Severe abdominal pain
- Severe chest pain or difficulty breathing
- Stroke symptoms, such as vision loss, sudden numbness, weakness, slurred speech, or confusion
- Suicidal or homicidal feelings
